One Last LookEmmie and
her mother are headed for
the desert to help
Grandmama Ola pack up
her life. Box by box, the
pieces of Ola's past are
neatly tucked away, and a
collection of memories is
opened. As the end of
their final visit draws
closer, Emmie, Mama, and
Ola come to terms with
the history they share.
Each holds on to a

'This book may help you
to understand life more
clearly' Paul Smith,

fashion designer Welcome
to THE book on NLP. The
essence of NLP is the
ability to study and
reproduce excellence in
yourself and to support
others to do the same.
NLP AT WORK helps you
do that by developing an
attitude of curiosity,
naivety and learning - and
giving you the ability to
improvise with skill in
real-time. Neuro Linguistic
Programming is how you
make sense of your world
and, most importantly,
how you make it what you
want it to be: * Neuro: the
way you filter and process
your experience through
your senses. * Linguistic:
the way you interpret
your experience through
language. * Programming:
the way you make sense
of your experience to
create your personal
programme. NLP AT
WORK is one of the most
popular books ever
published on the practical
skills of NLP and how it
can be applied in

business. It transformed
NLP from a peripheral art
into an accessible,
practical concept with
relevant applications in
the areas of influence,
communication,
negotiation, teamwork
and coaching. This major
new edition has been
revised throughout and
expanded to include a
new section on coaching
with NLP, showing how
this approach is so
different to traditional
methods, and a new
chapter on
Metamessages. Clear,
readable and jargon free,
this book will help you get
to the essence of what
makes you and your
business excellent and
unique.

The Real ACT (CD) 3rd Edition American Mathematical Soc. Naráyana's best-seller gives its reader much more than "Friendly Advice." In one handy collection—closely related to the world-famous Pañcatantra or Five Discourses on Worldly Wisdom—numerous animal fables are interwoven with human stories, all designed to instruct wayward princes. Tales of canny procuresses compete with those of cunning crows and tigers. An intrusive ass is simply thrashed by his master, but the meddlesome monkey ends up with his testicles crushed. One prince manages to enjoy himself with a merchant's wife with her husband's

consent, while another is kicked out of paradise by a painted image. This volume also contains the compact version of King Víkrama's Adventures, thirty-two popular tales about a generous emperor, told by thirty-two statuettes adorning his lion-throne. Co-published by New York University Press and the JJC Foundation For more on this title and other titles in the Clay Sanskrit series, please visit <http://www.claysanskritlibrary.org>

 “The College Solution helps readers look beyond over-hyped admission rankings to discover schools that offer a quality education at affordable prices. Taking the guesswork out of saving and finding money for college, this is a practical and insightful must-have guide for every parent!” —Jaye J.

Fenderson, Seventeen’s College Columnist and Author, Seventeen’s Guide to Getting into College “This book is a must read in an era of rising tuition and falling admission rates. O’Shaughnessy offers good advice with blessed clarity and brevity.” —Jay Mathews, Washington Post Education Writer and Columnist “I would recommend any parent of a college-bound student read The College Solution.” —Kal Chany, Author, The Princeton Review’s Paying for College Without Going Broke “The College Solution goes beyond other guidebooks in providing an abundance of information about how to afford college, in addition to how to approach the selection process by putting the student first.” —Martha “Marty” O’Connell, Executive Director, Colleges That Change Lives “Lynn O’Shaughnessy always focuses on what’s in the consumer’s best interest, telling families how to save money and avoid making costly mistakes.” —Mark Kantrowitz, Publisher, FinAid.org and Author, FastWeb College Gold “An antidote to the hype and hysteria about

getting in and paying for college! O’Shaughnessy has produced an excellent overview that demystifies the college planning process for students and families.” —Barmak Nassirian, American Association of Collegiate Registrars and Admissions Officers For millions of families, the college planning experience has become extremely stressful. And, unless your child is an elite student in the academic top 1%, most books on the subject won’t help you. Now, however, there’s a college guide for everyone. In The College Solution, top personal finance journalist Lynn O’Shaughnessy presents an easy-to-use roadmap to finding the right college program (not just the most hyped) and dramatically reducing the cost of college, too. Forget the rankings! Discover what really matters: the quality and value of the programs your child wants and deserves. O’Shaughnessy uncovers “industry secrets” on how colleges actually parcel out financial aid—and how even “average” students can maximize their share. Learn how to send your kids to expensive private schools for virtually the cost of an in-state public

college...and how promising students can pay significantly less than the “sticker price” even at the best state universities. No other book offers this much practical guidance on choosing a college...and no other book will save you as much money! • Secrets your school’s guidance counselor doesn’t know yet The surprising ways colleges have changed how they do business • Get every dime of financial aid that’s out there for you Be a “fly on the wall” inside the college financial aid office • U.S. News & World Report: clueless about your child Beyond one-size-fits-all rankings: finding the right program for your teenager • The best bargains in higher education Overlooked academic choices that just might be perfect for you

The authors define a class of random measures, spatially independent martingales, which we view as a natural generalization of the canonical random discrete set, and which includes as special cases many variants of fractal

percolation and Poissonian cut-outs. The authors pair the random measures with deterministic families of parametrized measures, and show that under some natural checkable conditions, a.s. the mass of the intersections is Hölder continuous as a function of t . This continuity phenomenon turns out to underpin a large amount of geometric information about these measures, allowing us to unify and substantially generalize a large number of existing results on the geometry of random Cantor sets and measures, as well as obtaining many new ones. Among other things, for large classes of random fractals they establish (a) very strong versions of the Marstrand-Mattila projection and slicing results, as well as dimension conservation, (b) slicing results with respect to algebraic curves and self-similar sets, (c) smoothness of convolutions of measures, including self-convolutions, and nonempty interior for sumsets, and (d) rapid Fourier decay. Among other applications, the authors obtain an answer to a question of I. Łaba in connection to the

restriction problem for fractal measures. *ACT Math Prep Book 2020 and 2021* Peterson's This volume aims to highlight trends and important directions of research in orthogonal polynomials, q -series, and related topics in number theory, combinatorics, approximation theory, mathematical physics, and computational and applied harmonic analysis. This collection is based on the invited lectures by well-known contributors from the International Conference on Orthogonal Polynomials and q -Series, that was held at the University of Central Florida in Orlando, on May 10–12, 2015. The conference was dedicated to Professor Mourad Ismail on his 70th birthday. The editors strived for a volume that would inspire young researchers and provide a wealth of information in an engaging format. Theoretical, combinatorial and computational/algorithmic aspects are considered, and each chapter contains many references on its topic, when appropriate. - Report of the Officers** Academic Press The Perfect Score Project is an indispensable guide to acing the SAT - as well as the affecting story of a single mom's quest to light a fire under her teenage son. It all began as an attempt by Debbie Stier to help her high-school age son, Ethan, who would shortly be studying for the SAT. Aware that Ethan was a

typical teenager (i.e., completely uninterested in any test) and that a mind-boggling menu of test-prep options existed, she decided – on his behalf -- to sample as many as she could to create the perfect SAT test-prep recipe. Debbie's quest turned out to be an exercise in both hilarity and heartbreak as she took the SAT seven times in one year and in-between “went to school” on standardized testing. Here, she reveals why the SAT has become so important, the cottage industries it has spawned, what really works in preparing for the test and what is a waste of time. Both a toolbox of fresh tips and an amusing snapshot of parental love and wisdom colliding with teenage apathy, *The Perfect Score Project* rivets. In the book Debbie does it all: wrestles with Kaplan and Princeton Review, enrolls in Kumon, navigates khanacademy.org, meets regularly with a premier grammar coach, takes a battery of intelligence tests, and even cadges free lessons from the world's most prestigious (and expensive) test prep company. Along the way she answers the questions that plague every test-

prep rookie, including: “When do I start?” ... “Do the brand-name test prep services really deliver?” ... “Which should I go with: a tutor, an SAT class, or self study?” ... “Does test location really matter?” ... “How do I find the right tutor?” ... “How do SAT scores affect merit aid?” ... and “What's the one thing I need to know?” The Perfect Score Project's combination of charm, authority, and unexpected poignancy makes it one of the most compulsively readable guides to SAT test prep ever – and a book that will make you think hard about what really matters.

The Fourth Edition of *Applied Process Design for Chemical and Petrochemical Plants Volume 2* builds upon the late Ernest E. Ludwig's classic chemical engineering process design manual. Volume Two focuses on distillation and packed towers, and presents the methods and fundamentals of plant design along with supplemental mechanical and related data, nomographs, data charts and heuristics. The Fourth Edition is significantly

expanded and updated, with new topics that ensure readers can analyze problems and find practical design methods and solutions to accomplish their process design objectives. A true application-driven book, providing clarity and easy access to essential process plant data and design information. Covers a complete range of basic day-to-day petrochemical operation topics. Extensively revised with new material on distillation process performance; complex-mixture fractionating, gas processing, dehydration, hydrocarbon absorption and stripping; enhanced distillation types.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina

in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to

action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

The written text was a pervasive feature of cultural practices in the medieval Middle East. At the heart of book circulation stood libraries that experienced a rapid expansion from the twelfth century onwards. While the existence of these libraries is well known our knowledge of their content and structure has been very limited as hardly any medieval Arabic catalogues have been preserved. This book discusses the largest and earliest medieval library of the Middle East for which we have documentation - the Ashrafiya library in the very centre of Damascus - and edits its catalogue. This catalogue shows that even book collections attached to Sunni religious institutions could hold rather unexpected titles, such as stories from the 1001 Nights, manuals for traders, medical handbooks, Shiite prayers, love poetry and

texts extolling wine consumption. At the same time this library catalogue decisively expands our knowledge of how the books were spatially organised on the bookshelves of such a large medieval library. With over 2,000 entries this catalogue is essential reading for anybody interested in the cultural and intellectual history of Arabic societies. Setting the Ashrafiya catalogue into a comparative perspective with contemporaneous libraries on the British Isles this book opens new perspectives for the study of medieval libraries.

The end of the Cold War and the associated dramatic changes in the geopolitical environment have led many observers to conclude that much of our past thinking about U.S. national security interests and policies is now outmoded and that a fundamental rethinking of these interests and policies is required. In particular, the notion is becoming widespread that economic factors and concerns will play a more prominent role in defining

and pursuing U.S. national security objectives. The authors' aim in convening the conference was to advance understanding of the emerging 'economic dimensions' of U.S. national security policymaking. The aim of this report is the same. It is meant as a contribution to the task of defining a useful frame of reference for what will undoubtedly be a continuing discussion of the relation between economics and national security. Although it is not intended as a summary of conference proceedings, this report draws heavily on the ideas and hypotheses put forward during the conference. In accordance with the ground rules established at the conference, the authors have not attributed any of the ideas noted in this report to particular conference participants. They have tried to retain the exploratory and speculative tone of the conference discussions.
