For prospective undergraduate students of Art History, or professionals looking to develop an existing art history career or move into the field, Careers in Art History groups jobs by theme to show the range of careers available within certain sectors and how they interconnect. This edition has also included more potential careers, including less obvious roles such as advertising, heritage tourism and museum retail, and reflected the changing job market with an extended entry on freelance work. This edition also contains new sections with practical information on marketing yourself, writing CVs and finding funding, as well as updated 'further information' sections, accompanying each entry.

Newspapers as Organizations Springer Nature

Pulling Newspapers Apart: Analysing Print Journalism explores contemporary UK national and local newspapers at a significant and pivotal moment in their development when some pundits are busily, if mistakenly, announcing their demise. The book offers a detailed examination of features which previous studies have tended to neglect, such as editorial formats (News, Op Ed pages, readers' letters, cartoons, obituaries, advice columns, features and opinion columns), aspects of newspaper design (page layout, photographs, supplements, online editions, headlines, the emergence of the compact and Berliner editions), newspaper contents (sport, sex and Page 3, royalty, crime, moral panics and politics) as well as the content of newspapers which is not generated by in house journalists (advertising, TV listings, horoscopes, agency copy and public relations materials). This innovative and accessibly written collection provides journalism and media students with an invaluable study of newspapers in the digital age.

After the Interview in Community Oral History University of California Press

Based on the premise that students can learn a great deal by reading and writing a newspaper, this book was created by preservice instructors to teach upper elementary students (grades 3-5) newspaper concepts, journalism, and how to write newspaper articles. It shows how to use newspaper concepts to help students integrate knowledge from multiple disciplines as they write about current events and the lives of others in an unbiased and accurate way. Based on the Newspaper in Education program--a cooperative venture between newspaper publishers and schools that offers newspaper activities to teach reading and content skills and strategies--the book takes the concept further and incorporates a focus on writing. The result of these lessons is an actual newspaper that students can publish for their classroom or school. Following an Introduction, the book's seven chapters are as follows: (1) Background Information for Teachers; (2) Teaching Journalism Basics; (3) Interviewing, Writing Quotes, and Using Figurative Language; (4) Elements and Organizational Structure of News Stories; (5) Writing Different Types of Newspaper Stories; (6) The Final Steps: Revision, Editing, Layout, and Publication; and (7) Student Evaluation of Concept Units. Contains 12 references. Appendixes provide student worksheets, two sample articles, a layout and design sheet, a glossary of newspaper terms, a stylebook, and a listing of additional resources. (SR)

This open access book describes how elite studies theoretically and methodologically construct their object, i.e. how particular conceptualizations of elites are turned into research practice using different methods for collecting, dealing with and analyzing empirical data. The first of four sections focuses on what Mills named the power elite and includes Bourdieu's field of power. The second section addresses studies of the domain of economic power, whereas the third section centers on research on elite education. The fourth and last section highlights research on symbolic power, either within social fields or as a dimension of social structure at large, areas where recognition is essential. All sections comprise empirical case studies of elites and power, whereby each of which makes explicit the various methodological choices made in the research process. Through focusing on methodological approaches for the study of elites and power and on how such approaches relate to each other as well as to the theoretical perspectives that underpin them, this book will be a valuable source for social scientists.

At the turn of the past century, the main function of a newspaper was to offer "menus" by which readers could make sense of modern life and imagine how to order their daily lives. Among those menus in the mid-1910s were several that mediated the interests of movie manufacturers, distributors, exhibitors, and the rapidly expanding audience of fans. This writing about the movies arguably played a crucial role in the emergence of American popular film culture, negotiating among national, regional, and local interests to shape fans' ephemeral experience of moviegoing, their repeated encounters with the fantasy worlds of "movieland," and their attractions to certain stories and stars. Moreover, many of these weekend pages, daily columns, and film reviews were written and consumed by women, including one teenage girl who compiled a rare surviving set of scrapbooks. Based on extensive original research, Menus for Movieland substantially revises what moviegoing meant in the transition to what we now think of as Hollywood.

This volume is the first book-length study of disguised forms of plagiarism that mar the body of published research in humanities disciplines. As a contribution to applied research ethics, this practical guide offers a typology of the principal forms of disguised plagiarism. It provides detailed analyses, in-depth case studies, and useful flow charts to assist researchers, editors, and publishers in protecting the integrity of the body of published research literature. Disguised plagiarism is more subtle than copy-and-paste plagiarism; all its varieties involve some additional concealment that creates further distance between the plagiarizing text and its source. These disguised forms are the most difficult forms of plagiarism to detect. Readers of the volume will become acquainted with the subtler forms of plagiarism that corrupt the production and dissemination of knowledge in humanities fields. The book is valuable not only to those interested in research ethics, but also to those in humanities fields including philosophy, theology, and history.

The Manager's Pocket Guide to Interviewing and Hiring Top Performers Oxford University Press

When its first covered bridge was constructed on the Ashtabula-Trumbull Turnpike in 1832, Ashtabula County was closer to frontier than a "new Connecticut." Its rutted roads promised adventure and suggested prosperity but also great hardship. Covered bridges, made mostly of local timber, would eventually soften the brutality of travel, isolation and a well-watered landscape. Their proliferation and preservation gave Ashtabula County the nickname "Covered Bridge Capital of the Western Reserve." Admire both famous and forgotten crossings with Carl E. Feather, who has spent

over a quarter century mired in muddy creek beds, camera in hand, waiting for the perfect light."
