 The variable

on the right hand side can be called the first variable, while the variable on the left hand side can be called the second variable. Some functions have simple rules, like "for every x , return x^2 ." However, there can be other rules that are more elaborate. For example, "If $x < 0$, return $2x$, and if $x \geq 0$, return $3x$." These are called *piecewise functions*, because their rules aren't uniform, but

consist of multiple pieces. A piecewise function is a function built from pieces of different functions over different intervals.
