Given the popular-level conversations on phenomena like the Gospel of Thomas and Bart Ehrman's Misquoting Jesus, as well as the current gap in evangelical scholarship on the origins of the New Testament, Michael Kruger's Canon Revisited meets a significant need for an up-to-date work on canon by addressing recent developments in the field. He presents an academically rigorous yet accessible study of the New Testament canon that looks deeper than the traditional surveys of councils and creeds, mining the text itself for direction in understanding what the original authors and audiences believed the canon to be. Canon Revisited provides an evangelical introduction to the New Testament canon that can be used in seminary and college classrooms, and read by pastors and educated lay leaders alike. In contrast to the prior volumes on canon, this volume distinguishes itself by placing a substantial focus on the theology of canon as the context within which the historical evidence is evaluated and assessed. Rather than simply discussing the history of canon—rehashing the Patristic data yet again—Kruger develops a strong theological framework for affirming and authenticating the canon as authoritative. In effect, this work successfully unites both the theology and the historical development of the canon, ultimately serving as a practical defense for the authority of the New Testament books.

Law in Action John Wiley & Sons

"James Coriden offers a vision of canon law in the Catholic Church - seeing it not as an instrument of control but as a guide and guarantee of freedom for believers. In the process he emphatically joins the ongoing debate about the role of church law, a debate that he believes "will have profound implications for the long term," possibly reshaping the law and indeed "the very face of the church." While his message is addressed primarily to professional canonists, it will resonate among all Catholics who care about the way their church functions." "The view of canon law that unfolds in these pages is that of a ministry that upholds the freedom of believers and the good order of the community. This is based on the assumption that "church" is first of all a local community rather than a global structure. The test of effective law depends upon its service to the lived experience of its members in their own cultural, economic and social situations." "The concluding section of this book sets forth "An Urgent Agenda for the Future of the Ministry," particularly in the way church law is revised and amended."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. This highly useful book provides quick reference and accessibility to the current canon law of both churches. The entry for every canonical term presents its definition and the law relating to it in each canon. There are cross-references throughout to help the reader make further significant connections. Also included are terms not easily translated across the two canons, and some common terms from the Eastern Catholic Church. The appendices contain changes to the Universal law of the Roman Catholic Church which are outside the 1983 Code of Canon law. At a time when Christians are increasingly working side by side, this is an essential resource for pastoral workers, scholars and clergy in all the churches.

This volume deals with revelation, truth, canon, and interpretation as foundational concepts in pre-Nicene Christianity. Justin Martyr is used as a case study to develop these concepts within his second century context.

The Canon GPO FCIC

When first published in 1958, The Canons of the Council of Sardica, AD 343 at once became the standard account of the canons passed by the Western bishops assembled at Sardica in 343 and the thinking on Church matters that lay behind them. In this new edition Hamilton Hess has updated his account in the light of recent literature and translated all quotations into English to reach a wider audience. There is also a new section on the development of canons in the early Church from local provisions to general rules, and an appendix with the full texts of the canons in the original Latin, in the Greek translation, and in the recasting by Theodours Diaconus, together with English translations of all three.

Canon Revisited BRILL

This book summarizes the "interim result" of the servitization activities in manufacturing industries. While the early literature on servitization tended to stress only its advantages, more recently, scholars have also started to refer to the challenges associated with servitization. This book attempts to give a balanced picture of servitization. The book is structured in four parts: Part I introduces the topic by presenting the most recent academic discussion about servitization and uses an empirical analysis to show the degree of servitization across Europe. The results of this analysis are then compared to the discussion in the literature. This comparison highlights the existing discrepancies between the rather euphoric literature and the more skeptical practical experience. The second and third parts attempt to explain these discrepancies by taking as a starting point the assumption that servitization recommendations have to consider the heterogeneity of the manufacturing sector and the capabilities of the provider. Part II presents articles which analyze the specific characteristics of different sectors with their barriers and potentials and presents frameworks for a successful servitization of the core sectors in European manufacturing industries which include, e.g. aeronautics, automotive, ICT, chemical industries, pulp and paper industries and different engineering sectors. Part III focuses on companies' capabilities which are necessary for successful servitization. These include strategic management, marketing, organization, innovation, engineering, human resources, controlling, quality and networks. All the contributions

in parts II and III add up to a detailed picture of servitization for sectors and functions and indicate the practical implications for enterprises in manufacturing industries. The fourth part concludes the book with a chapter summarizing the findings and giving an outlook of servitization in manufacturing industries, its challenges and future developments.

The Churchman

Why is music composed by women so marginal to the standard 'classical' repertoire? In attempting to answer this fundamental question, this book examines the practices and attitudes that have led to the exclusion of women composers from the received

'canon' of performed musical works. Focusing on the tradition since 1800, Marcia J. Citron makes substantial use of feminist and interdisciplinary theory. After introducing the notion of canon and its role in cultural discourse, she explores important elements of canon formation: creativity, professionalism, music as gendered discourse, and reception. A final chapter provides a critique of many of these ideas with respect to the canon of the university music history curriculum. Professor Citron shows how an understanding of canon formation illuminates some of the basic issues that affect the discipline as a whole.
