The Red Duke New York Review of Books	
A New York Review Books Original An uncompromising contrarian, a passionate polemicist, a man of quick wit and wide learning, an anarchist, a pacifist, and a virtuoso of the slashing phrase, Dwight Macdonald was an indefatigable and indomitable critic of America’s susceptibility to well-meaning cultural fakery: all those estimable, eminent, prizewinning works of art that are said to be good and good for you and are not. He dubbed this phenomenon “Midcult” and he attacked it not only on aesthetic but on political grounds. Midcult rendered people complacent and compliant, secure in their common stupidity but neither happy nor free. This new selection of Macdonald’s finest essays, assembled by John Summers, the editor of The Baffler, reintroduces a remarkable American critic and writer. In the era of smart, sexy, and everything indie, Macdonald remains as pertinent and challenging as ever.

Stasiland tells true stories of people who heroically resisted the communist dictatorship of East Germany, and of people who worked for its secret police, the Stasi. Internationally hailed as a classic, it is ‘fascinating, entertaining, hilarious, horrifying and very important’ (Tom Hanks) and ‘a heartbreaking, beautifully written book.’ (Claire Tomalin). East Germany was one of the most intrusive surveillance states of all time. One in 7 people spied on their friends, family and colleagues. In ‘the most humane and sensitive way’ (J.M. Coetzee) Funder tells the true stories of four people who had the extraordinary courage to refuse to collaborate with the Stasi, and the price they paid. She meets Miriam Weber, who was imprisoned at 16 after scaling the Berlin Wall. She drinks with the legendary “Mik Jegger” of the Eastern Bloc who was ‘disappeared’. And she finds former Stasi men who defend their regime long past its demise, and yearn for the second coming of Communism. Stasiland won the Samuel Johnson Prize for best non-fiction published in English in 2004. It was a finalist for the Guardian First Book Award, the W.H. Heinemann Award, the Index Freedom of Expression Awards, The Age Book of the Year Awards, the Queensland Premier’s Literary Award and the Adelaide Festival Awards for Literature (Innovation in Writing). It is read in schools and universities in many countries, and has been adapted for CD and the stage by The National Theatre, London.

From pathology to treatment, MicroRNAs in Diseases and Disorders highlights the role of microRNAs (miRNAs) in the development and progression of a variety of diseases, including cancer, neurological disease, endocrine disease and autoimmune disease, and underscores the utilization of miRNA targets in the treatment of these conditions. Providing a comprehensive account, this book also includes the identification of miRNAs as diagnostic	
and prognostic biomarkers for disease, as well as evaluates translational value from clinical trials using synthesized and functionalized miRNA mimics and inhibitors. With a global contribution list and chapters from leading experts across the field, MicroRNAs in Diseases and Disorders is an invaluable reference to miRNA researchers and health professionals in a variety of disease areas in government, academia and industry. The book will also appeal to pharmaceutical and medicinal chemists with an interest in miRNA targeting therapeutics, as well as to advanced students in chemical biology and drug discovery.

From today’s vantage point it can be denied that the confidence in the abilities of globalism, mobility, and cosmopolitanism to illuminate cultural signification processes of our time has been severely shaken. In the face of this crisis, a key concept of this globalizing optimism as World Literature has been for the past twenty years necessarily is in the need of a comprehensive revision. World Literature, Cosmopolitanism, Globality: Beyond, Against, Post, Otherwise offers a wide range of contributions approaching the blind spots of the globally oriented Humanities for phenomena that in one way or another have gone beyond the discourses, aesthetics, and political positions of liberal cosmopolitanism and neoliberal globalization. Departing basically (but not exclusively) from different examples of Latin American literatures and cultures in globalized contexts, this volume provides innovative insights into critical readings of World Literature and its related conceptualizations. A timely book that embraces highly innovative perspectives, it will be a mustread for all scholars involved in the field of the global dimensions of literature.

Selected by the Modern Library as one of the 100 best novels of all time Published in 1975, Ragtime changed our very concept of what a novel could be. An extraordinary tapestry, Ragtime captures the spirit of America in the era between the turn of the century and the First World War. The story opens in 1906 in New Rochelle, New York, at the home of an affluent American family. One lazy Sunday afternoon, the famous escape artist Harry Houdini swerves his car into a telephone pole outside their house. And almost magically, the line between fantasy and historical fact, between real and imaginary characters, disappears. Henry Ford, Emma Goldman, J. P. Morgan, Evelyn Nesbit, Sigmund Freud, and Emiliano Zapata slip in and out of the tale, crossing paths with Doctorow's imagined family and other fictional characters, including an immigrant peddler and a ragtime musician from Harlem whose insistence on a point of justice drives him to revolutionary violence.

A NEW YORK REVIEW BOOKS ORIGINAL Novels in Three Lines collects more than a thousand items that appeared anonymously in the French newspaper Le Matin in 1906—true stories of murder, mayhem, and everyday life presented with a ruthless economy that provokes laughter even as it shocks. This extraordinary trove, undiscovered until the 1940s and here translated for the first time into English, is the work of the mysterious Félix Fénéon. Dandy, anarchist, and critic of genius, the discoverer of Georges Seurat and the first French publisher of James Joyce, Fénéon carefully maintained his own anonymity, toiling for years as an obscure clerk in the French War Department. Novels in Three Lines is his secret chef-d’oeuvre, a work of strange and singular art that brings back the long-ago year of 1906 with the haunting immediacy of a photograph while looking forward to such disparate works as Walter Benjamin’s Arcades Project and the Death and Disaster series of Andy Warhol.	
MicroRNAs in Diseases and Disorders R. R. Bowker	
He knew nothing of celestial navigation or of the existence of the Pacific Ocean. He was a self-promoting and ambitious entrepreneur. His maps were a hybrid of fantasy and delusion. When he did make land, he enslaved the populace he found, encouraged genocide, and polluted relations between peoples. He ended his career in near lunacy. But Columbus had one asset that made all the difference, an inborn sense of the sea, of wind and weather, and of selecting the optimal course to get from A to B. Laurence Bergreen's energetic and bracing book gives the whole Columbus and most importantly, the whole of his career, not just the highlight of 1492. Columbus undertook three more voyages between 1494 and 1504, each designed	

to demonstrate that he could sail to China within a matter of weeks and convert those he found there to Christianity. By their conclusion, Columbus was broken in body and spirit, a hero undone by the tragic flaw of pride. If the first voyage illustrates the rewards of exploration, this book shows how the subsequent voyages illustrate the costs - political, moral, and economic.

In his most wide-ranging and accessible work, Frederic Jameson argues that postmodernism is the cultural response to the latest systemic change in world capitalism. He seeks here to crystallize a definition of a term which has taken on so many meanings that it has virtually lost all historical significance. He presents an extensive discussion on the cultural landscape - both 'high' and 'low' - of postmodernity, evaluating the political fortunes of the new term and surveying postmodern developments in a range of different fields - from market ideology to architecture, from painting and instalment art to contemporary punk film, from video art and high literature to deconstruction. Finally, Jameson reevaluates the concept of

postmodernism in light of postmodern critiques of totalization and historical narratives - from the notion of decadence to the dynamics of small groups, from religious fundamentalism to hi-tech science fiction - while touching on the nature of contemporary cultural critique and the possibilities of cognitive mapping in the present multinational world system. This provocative book will be fundamental to all future discussions of postmodernism.

DEFA Berghahn Books

The coming of the fairies, by Arthur Conan Doyle, illustrated from photographs. Author of "The New Revelation", "The Vital Message", "Wanderings of a Spiritualist". This book contains reproductions of the famous Cottingley photographs, and gives the whole of the evidence in connection with them. The diligent reader is in a good position form a judgment upon the authenticity of the pictures. This narrative is not a special plea for that authenticity, but is simply a collection of facts the inferences from which may be accepted or rejected as the reader may think fit. The series of incidents set forth in this little volume represent either the most elaborate and ingenious hoax every played upon the public, or else they constitute an event in human history which may in the future appear to have been epoch-making in its character. Reproduction of 1922 Edition.
