Although  
there are  
many  
textbooks in  
the field of

educational  
administration  
describing  
various  
organizational  
theories, this  
text is unique

in tying organizational theory explicitly and systematically to a well-formulated problem-analysis methodology. It provides particular examples of bureaucratic, political, and leadership theories as well as descriptions of two broader theoretical frameworks: Burrell and Morgan's conceptual matrix and systems thinking. Special features include: \* a fully

developed methodology for describing and documenting problems in schools; \* a systematic method for using different theoretical perspectives to analyze the causes of problems in schools; \* carefully formulated questions illustrating how different theoretical frameworks lead policy analysts to look at problems differently and to focus on different types and sources of information

concerning their possible causes; \* substantial sample papers illustrating the methodology; and \* a range of illustrative organizational theories, amply described and succinctly grounded intellectually. This book is directed toward students in organizational theory and problem analysis classes and their professors, as well as to school administrators seeking to examine their

problems and policies from perspectives that go beyond personal experience. **Building the study skills needed for 11+ and pre-tests** Disha Publications Bond English Assessment Papers for 9-10 years Book 1 have been designed by Bond, the number 1 provider of 11+ practice materials.
