Market Prospects to 2010 Routledge

"The authors comprehensively and accurately describe, in detail, the history, concepts and technical aspects of the Ocean Thermal Energy Conversion (OTEC) Program...a splendid reference Volume which future OTEC entrepreneurs will find most worthwhile." --Ocean Engineering

Industrial Groupings in Japan Elsevier

This book gives an account of concrete market situations and describes marketing strategies and distribution channels of German manufacturing firms, German and foreign trading firms and Japanese partner firms on the Japanese market in important product areas.

Profile of the International Pump Industry Springer Science & Business Media

This volume in the Hydraulic Machinery Book Series covers the most important types of hydraulic machinery: hydraulic turbines for transforming water power to mechanical output; and pumps for producing fluid pressure for many purposes. It describes the features of mechanical design of various types of turbines and pumps. The structure of a hydraulic machine is decided primarily to satisfy the need of fluid flow, so hydraulic characteristics of the machines are also stressed.

Manufacturing processes of turbines and pumps and their requirements are referred to in chapters on mechanical construction.

Major Companies of The Far East and Australasia 1993/94 Springer Science & Business Media

This book represents the eighth edition of what has become an established reference work, MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA. This volume has been carefully researched and updated since publication of the previous arrangement of the book 3dition, and provides more company data on the most important companies in the region. The information in the book has been arranged in order to allow the reader to find any entry rapidly and accurately. It is completely free of charge. For the second time, a third volume has been added to the series, covering major companies in Australia and New Zealand, in addition three indexes are provided on coloured paper at the back of the book. The companies listed have been selected on the grounds of the size of their sales volume or balance sheet or their importance to the business environment of the country in all companies having entries in the book irrespective of their which they are based. main country

of operation. The book is updated and published every year. Any company The alphabetical index to companies within each country of that considers it is eligible for inclusion in the next edition of East Asia lists companies by their country of operation.

Volume 2: East Asia CRC Press

Written by an experienced engineer, this book contains practical information on all aspects of pumps including classifications, materials, seals, installation, commissioning and maintenance. In addition you will find essential information on units, manufacturers and suppliers worldwide, providing a unique reference for your desk, R&D lab, maintenance shop or library. * Includes maintenance techniques, helping you get the optimal performance out of your pump and reducing maintenance costs * Will help you to understand seals, couplings and ancillary equipment, ensuring systems are set up properly to save time and money * Provides useful contacts for manufacturers and suppliers who specialise in pumps, pumping and ancillary equipment

Proceedings of the 2015 International Conference on Water Resources and Environment (Beijing, 25-28 July 2015) Elsevier

This volume is concerned with vibration-free and quiet operation of hydraulic machines. It deals with the problems caused by mechanical and hydraulic excitations in hydraulic machinery (except for transients which are treated in a separate volume). The invited authors from five continents are internationally recognized experts in their fields. The book looks at the fundamentals for analysis of fluid structure systems, structural vibration, shaft rotordynamics and system instability; noise and diagnosis are introduced with examples from practical experience.

The Oriental Economist's Japan Economic Yearbook Oxford University Press on Demand

Written by prominent scholars in the field, this is an account of the Japanese firm and its sources of success. Containing both theoretical and empirical work, the book ranges across labour and information economics, finance, organizational theory, and others.

TOYO KEIZAI Japan CSR Data eBook 2013 Oxford University Press on Demand

This book represents the tenth edition of what has become an established reference work, MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA. This volume has been carefully researched and updated since publication of the previous arrangement of the book edition, and provides more company data on the most important companies in the region. The information in the book has been arranged in order to allow the reader to find any entry rapidly and accurately. It is completely free of charge. Company entries are listed alphabetically within each section; The companies listed have been selected on the

This volume reviews the preparation, structures, physicochemical properties and applications of graphite fluorides, mainly based on the results obtained by the authors. Their interest in graphite fluorides stemmed from research on the ``anode effect'', in electrolytic production of fluorine gas in KF.2HF melt using carbon electrodes. The formation of a thin graphite fluoride film on carbon anodes made it difficult to continue the electrolysis of KF.2HF at a high current density. To elucidate this phenomenon studies on graphite fluoride were initiated. In the course of these systematic studies, the use of graphite fluoride in high-energy batteries became successful: a new graphite fluoride (C₂F)_n was found; and another fluorineographite intercalation compound with ionic bonding, C_xF, was synthesized. During this research it was established that C_xF is closely associated with the ``anode effect''. The book will be of interest to all those involved in the study and research of graphite fluorides, particularly fluorine chemists, electrochemists, and fluorine and battery companies.

The new 6th Edition of this popular market report will be published by the end of December. Brought to you by the team behind Pump Industry Analyst, Profile of the International Pump Industry: Market Prospects to 2010, reviews the markets and major manufacturers of industrial pumps. The report includes a detailed five-year review of mergers and acquisitions, and a Top 20 Table, ranking the leading pump manufacturers by estimated pump sales. Market estimates and forecasts to 2010 are presented by region and pump type, along with profiles of 50 leading international pump manufacturers. Finance, Investment and Innovation Routledge

Endowed with abundant energy resources, the Soviet Union is the world's largest oil producer and a major exporter of both oil and gas. Energy exports provide over half of Soviet hard-currency receipts, and subsidized energy sales to Eastern Europe are vital tools of Soviet influence in that region. Despite this enviable position, there have been indications in the past few years that the U.S.S.R. may soon face an energy shortage. In addition to examining the significance of U.S.

petroleum equipment and technology for Soviet energy development, this book addresses the following questions: First, what opportunities and problems confront the U.S.S.R. in its five primary energy industries-oil, gas, coal, nuclear, and electric power-and what are plausible prospects for these industries in the present decade? Second, what equipment and technology are most needed by the U.S.S.R. in these areas, how much of each has been or is likely to be purchased from the West, and to what extent is the United States the sole or preferred supplier? Third, and perhaps most critical, how much difference could the West as a whole or the United States alone make to Soviet energy availability by 1990, and what are the implications of either providing or withholding such assistance for both the entire Soviet bloc and for the West?

[The Environment and Our Future](#) Elsevier

This fifth edition of Profile of the International Pump Industry - Market Prospects to 2007 reviews the markets, technological trends, and major manufacturers of industrial pumps. Profile of the International Pump Industry covers both the international pump industry and its associated market, illustrating the structure of the industry, highlighting developments, identifying future trends, and looking at recent mergers and acquisitions. Market estimates and forecasts to 2007, by region and pump type, are presented along with an analysis of the main end-user markets for industrial pumps, and a technology overview. Forty leading international pump manufacturers are profiled and a Top 20 league table of pump manufacturers, ranked by sales of pumps, is given. A directory of pump manufacturing companies and an index of companies by product type are also included.

Graham & Trotman Ltd is a member

of the Kluwer Academic Publishers Group and publishes over 450 business and technology books. A catalogue is available on request.

U.S. Export Opportunities to Japan Elsevier

This book provides a critical evaluation of the literature on finance, investment and innovation and proposes new research methods for evaluating the comparative performance of financial systems in supporting innovation. The comparative advantage of this book is that of being directly focused on one of the main unsolved issues in monetary and financial economics: the relative effectiveness of

national financial systems in supporting innovation. It proposes various theoretical and empirical contributions that, taken together, allow to evaluate the relative effectiveness of some of the most important country systems such as Japan, and the UK and Italy.
