**11+ Maths Practice Papers 1** Galore  
Park Publishing

This book is a captivating account of a  
professional mathematician's  
experiences conducting a math circle for  
preschoolers in his apartment in Moscow  
in the 1980s. As anyone who has taught  
or raised young children knows,  
mathematical education for little kids is  
a real mystery. What are they capable  
of? What should they learn first? How

hard should they work? Should they even "work" at all? Should we push them, or just let them be? There are no correct answers to these questions, and the author deals with them in classic math-circle style: he doesn't ask and then answer a question, but shows us a problem--be it mathematical or pedagogical--and describes to us what happened. His book is a narrative about what he did, what he tried, what worked, what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half-dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual

development in young children will find this book to be an invaluable, inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession. Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI). Mathematics year 4 set 8 Galore Park Exam Board: ISEB Level: 11 Plus Subject: English First Teaching: September 2012 First Exam: Autumn 2013 Practice papers to test pupils ahead of pre-tests and 11 plus independent school entrance exams.
