It is one of the animating concepts of the modern era. From the Enlightenment onwards, the West has had

an enduring belief that through the evolution of institutions, innovations, and ideas, the human condition is improving. This process is supposedly accelerating as new technologies, individual freedoms, and the spread of global norms empower individuals and societies around the world. But is progress inevitable? Its critics argue that human civilization has become different, not better, over

the last two and a half centuries. What is seen as a breakthrough or innovation in one period becomes a setback or limitation in another. In short, progress is an ideology not a fact; a way of thinking about the world as opposed to a description of reality. In the seventeenth semi-annual Munk Debates, which was held in Toronto on November 6, 2015, pioneering cognitive

scientist Steven Pinker and bestselling author Matt Ridley squared off against noted philosopher Alain de Botton and bestselling author Malcolm Gladwell to debate whether humankind's best days lie ahead. **Handbook for Business Writing** Peter Pauper Press Incorporated This wonderfully Illustrated book contains many color plates.  "Two beings dwelt within me: one of

them, having seen too much of filth and loathsomenesses, had become chastened. Life's dreadful humdrum had made him skeptical and suspicious, and he looked with helpless compassion upon all people, including himself. This individual longed to lead a quiet, retired life far away from cities and people. He dreamed of going to Persia, of entering a monastery, of living in a forester's hut or the lodge of a railway guard, or becoming a night watchman somewhere on the outskirts of town. The fewer the people and the more remote, the better." The other individual, baptized by the holy spirit of wise and truthful books, realized that life's dreadful humdrum exerted a ruthless power which might easily lop off his head or crush him under a grimy heel. And so he summoned all his strength in self-defense, baring his teeth, clenching his fists, ever ready for a fight or an argument." In My Apprenticeship, Maxim Gorky (1868-1936) gives an exact account of his own adolescence. After the death of his mother, fourteen-year-old Alexei Peshkov (Gorky) sets out to earn his own living. First he is the errand boy in a shoe shop; then, in turn,

a draughtsman? s apprentice, a dishwasher on a Volga steamboat, and an apprentice in a studio where icons are painted. Repulsed by the ugly mediocrity of middle-class life, by the "senseless, stupid animosity poisoning the life around him," he constantly searches for something better. My Apprenticeship (1916) is the second book of Gorky's autobiographical trilogy,

each book of which represents and independent work.
