Netter's Internal Medicine E-Book Butterworth-Heinemann

This book explains how to use intravitreal steroids optimally in the management of patients with intraocular inflammation (uveitis) and macular edema. The rationale for this treatment approach is first explained by examining the pathophysiology of these disease entities, with particular attention to the major role of inflammatory processes. Devices for the delivery of steroids to the eye are discussed, and guidance provided on the role of imaging studies before, during, and after steroid therapy. The value of different steroidal approaches is then considered in detail. Other topics addressed include the use of steroids as a surgical adjunct and within a combination strategy. Uveitis and macular edema are common sight-threatening diseases or complications of diabetes and retinal vein occlusion for which no adequate treatment was available until recently. Both trainees and practitioners will find Intravitreal Steroids to be an invaluable aid in combating these blinding diseases.

300 Mcqs For The Duke Elder Ophthalmology Exam Elsevier Health Sciences

Oculoplasty for Ophthalmologists Elsevier Health Sciences

"Essentials in Ophthalmology" is a new review series covering all of ophthalmology categorized in eight subspecialties. It will be published quarterly, thus each subspecialty will be reviewed biannually. Given the multiplicity of medical publications already available, why is a new series needed? Consider that the half-life of medical knowledge is estimated to be around 5 years.

Moreover, it can be as long as 8 years between the first description of a medical innovation in a peer-reviewed scientific journal and publication in a medical textbook. A series that narrows this time span between journal and textbook would provide a more rapid and efficient transfer of medical knowledge into clinical practice, and enhance care of our patients.

Review of Ophthalmology Jaypee Brothers Medical Publishers Pvt. Limited

This text provides a review of the essential clinical and scientific information in ophthalmology. Questions at the end of each chapter with answers at the end of the book allow readers to test their understanding.

Review Questions in Ophthalmology Oxford University Press

MCQs for FRCOphth Part 2 is a key resource for candidates preparing to sit the Royal College of Ophthalmologists examination. Written by experts in the field, it is carefully mapped to the RCOphth curriculum, providing comprehensive preparation for all aspects of this challenging exam. Written for the new FRCOphth format, it contains 360 questions organised into five sections to reflect the subdivisions of the exam. A mock examination of 90 questions enables trainees to assess their level of knowledge, and practise the technique and approach needed for the examination. In addition to a small ratio of illustration based questions to reflect the real FRCOphth exam it also places an emphasis on areas that are not well covered in other materials, such as GMC and RCOphth guidelines. All answers are

accompanied by detailed explanations and relevant further reading sources, providing candidates with high-quality self-assessment. Offering a true test of the reader's ophthalmology knowledge, this is a must-buy for anyone preparing for the FRCOphth part 2 written exam.

Basic Ophthalmology BMJ Books

Why waste time guessing at what you need to know for the ophthalmology board exam? Maximize your exam preparation time with this quick-hit question and answer review. The unique question and single-answer format eliminates the guesswork associated with traditional multiple-choice Q&A reviews and reinforces only the correct answers you'll need to know on exam day. Emphasis is placed on distilling key facts and clinical pearls essential for exam success. Great for certification and re-certification, this high-yield review for the boards is the perfect compliment to larger texts for intense, streamlined review in the days and weeks before your exam.

Basic Sciences in Ophthalmology Springer

Multiple Choice Question (MCQ) book comprising 5 MCQ practice papers with a total of 450 questions for the FRCOphth Part 2 examination. The style and proportion of questions allocated by Subspeciality, Investigations, Therapeutics, Guidelines and Miscellaneous topics closely reflects that of current (2013) Part 2 MCQ papers. Each practice paper comprises 90 questions and is followed by a comprehensive Answers and Discussion paper, complete with source references.

Multiple Choice Questions in Ophthalmic and Neuroanatomy BMJ

Books

Today's academic environment presents assessment challenges defined by an increased volume of available information coupled with increased competition among students and time constraints. Multiple choice questions (MCQs) provide examiners with an opportunity to assess academic performance on the basis of instant recollection of correct answers in a minimal amount of time. MCQs Series for Life Sciences Volume 1 is a collection of MCQs on advanced topics and offers the following benefits for readers: □ Includes over 2600 relevant MCQs □ Covers five advanced subjects including biochemistry, cell biology, developmental biology, genetics & molecular biology and immunology. □ Simplified language and presentation of concepts □ Answers to each question are provided This MCQs eBook series in life sciences is, therefore, a handy reference for graduate and postgraduate students undertaking examinations or entrance tests as well as teachers or examiners involved in setting and controlling assessments in specific subjects in life sciences.

MCQs and EMQs in Surgery Bentham Science Publishers

A comprehensive and detailed compendium of ophthalmology, this text for the postgraduate trainee provides a broad overview in a straightforward style. There is little need to refer to larger books except for very detailed knowledge on a specific topic.

The Massachusetts Eye and Ear Infirmary Review Manual for Ophthalmology LWW

OphthoBook is the printed version of the amazing OphthoBook.com online book and video series. The combination of this text, along with the online video lectures, creates the most informative and easy-to-understand ophthalmology review ever written. It is geared toward medical students, optometry students, and non-ophthalmologists who want to learn more about the eye without getting bogged down with mindless detail. The book is broken down into ten chapters: 1. Eye History 2. Anatomy 3. Glaucoma 4. Retina 5. Infection 6. Neuroophthalmology 7. Pediatric Ophthalmology 8. Trauma 9. Optics 10. Lens and Cataract Each chapter also includes "pimp questions" you might be asked in a clinic. Also, an entire chapter of ophthalmology board-review questions, flashcards, and eye abbreviations. Perhaps most useful, each chapter corresponds to the 20-minute video lectures viewable at OphthoBook.com. And lots of fun cartoons!

FRCOphth Part 2 MCQs tfm Publishing Limited

Clinical Anatomy of the Eye has proved to be a very popular textbook for ophthalmologists and optometrists in training all over the world. The objective of the book is to provide the reader with the basic knowledge of anatomy necessary to practice ophthalmology. It is recognised that this medical speciality requires a detailed knowledge of the eyeball and the surrounding structures. The specialist's knowledge should include not only gross anatomic features and their development, but also the microscopic anatomy of the eyeball and the ocular appendages. The nerve and blood supply to the orbit, the autonomic innervation of the orbital structures, the visual pathway, and associated visual reflexes should receive great emphasis. The practical application of anatomic facts to ophthalmology has been emphasised throughout this book in the form of Clinical Notes in each chapter. Clinical problems requiring anatomic knowledge for their solution are presented at the end of each chapter. Illustrations are kept simple and overview drawings of the distribution of the cranial and autonomic nerves have been included.
