*Leading Continuous Change* Simon and Schuster "The Age of Agility: Building Learning Agile Leaders and Organizations focuses on learning agility, one of the most important trends in the business world during the past decade. Some surveys have found it

was the most frequently used criterion to measure leadership potential. Despite this popularity there are fundamental questions that need to be answered such as (a) What specifically is learning agility? (b) How many facets or dimensions does it have? (c) How do we measure it? and (d) Can it be developed? It appears that much of what

is known about the construct of learning agility has been gleaned from its application by practitioners. While this knowledge is an extremely useful place to begin, there is an urgent need to undergird this understanding with science. The purpose of this edited book is to systematically examine the construct through a more scholarly lens. Over 50

authors - both academic researchers and talent management practitioners - have contributed to the contents. The goal is to enhance knowledge of learning agility, distilling and synthesizing scientific evidence with best practices"-- *Successful Organizational Change: The Kotter-Cohen Collection (2 Books)* Harvard Business Press Learn how to lead organizational change with

sense of the dynamic world in which they operate. A.G.I.L.E. Thinking Demystified Harvard Business Press. Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was. Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a

large-scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their posses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells, for the first

time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business	School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed	the way we work. <u>Creating Business Agility</u> Harvard Business Review Press Based on a multi-year study with several large companies, <u>Resurgence</u> reveals how some of the most interesting and notable brands in the world have managed to stage remarkably successful comebacks following periods of decline. The core of this book is a smart, simple

four-part framework for reinvention, plus compelling advice distilled for general business readers. Yet, it also features fascinating, insider accounts of the change process, with stories from a core group of leaders at companies such as Motorola, Alberto Culver, Harley-Davidson, and others, as they considered the question: How do we reinvent a firm

that does not recognize the need for radical change? Three top marketing experts bring a compelling wealth of experience and knowledge to the forefront as they were granted extensive access to the executives at these companies and track how each of these organizations look dramatically different as a result of its changed efforts.

**The Leadership Factor** Oxford University Press  
This collection offers the full digital editions of two seminal books by global leadership expert John P. Kotter: his international bestseller, *Leading Change*, and *Accelerate*, his award-winning framework for enabling companies to compete and win in a world of constant turbulence and disruption. *Leading Change*—now considered

the change bible for leaders and managers worldwide—reveals why change is so difficult and lays out an actionable, eight-step process for implementing successful transformations. Cited by business leaders and influential organizations worldwide as the book to read when starting any type of change initiative, *Accelerate* (XLR8) vividly illustrates the five core principles

underlying a new dual operating system, the eight accelerators that drive it, and how leaders must create a sense of urgency through role modeling. Perhaps most crucial, the book reveals how the best companies focus and align their people's energy around what Kotter calls the big opportunity. If you're a pioneer, a leader who knows that bold change is necessary to survive and

thrive in an ever-changing world, these two books will set you on a path to accelerate into a better, more profitable future. Regarded by many as the authority on leadership and change, John P. Kotter is a New York Times bestselling author, award-winning business and management thought leader, business entrepreneur, inspirational speaker, and Harvard Business

School professor. His ideas, books, speeches, and the company he founded in 2008, Kotter International, have helped mobilize people around the world to better lead organizations, and their own lives, in an era of increasingly rapid change. Kotter has authored nineteen books to date—twelve of them bestsellers. His books have reached millions and have been printed in over 150 foreign language

editions. Fewer, Bigger, Bolder Harvard Business Review Press You've got a good idea. You know it could make a crucial difference for you, your organization, your community. You present it to the group, but get confounding questions, inane comments, and verbal bullets in return. Before you know what's happened, your idea is dead, shot down. You're furious.

Everyone has lost: Those who would have benefited from your proposal. You. Your company. Perhaps even the country. It doesn't have to be this way, maintain John Kotter and Lorne Whitehead. In Buy-In, they reveal how to win the support your idea needs to deliver valuable results. The key? Understand the generic attack strategies that naysayers and obfuscators deploy time and time again. Then engage these adversaries with tactics tailored to each strategy. By "inviting in the lions" to critique your idea--and being prepared for them--you'll capture busy people's attention, help them grasp your proposal's value, and secure their commitment to implementing the solution. The book presents a fresh and amusing fictional narrative showing attack strategies in action. It then provides several specific counterstrategies for each basic category the authors have defined--including: · Death-by-delay: Your enemies push discussion of your idea so far into the future it's forgotten. · Confusion: They present so much data that confidence in your proposal dies. · Fearmongering: Critics catalyze irrational

anxieties about your idea. · Character assassination: They slam your reputation and credibility. Smart, practical, and filled with useful advice, Buy-In equips you to anticipate and combat attacks--so your good idea makes it through to make a positive change. Make sales coaching a daily priority for top-of-game staff performance. Those who do it right prove time and time again that sales coaching works. If

you're one of the many managers yet to reap the benefits of sales coaching, the solution is in your hands. Based on one of today's most popular sales training programs *Crushing Quota* breaks the process down into manageable components, so you can make sales coaching a realistic, meaningful part of your staff's job. It all comes down to three critical points that the vast majority of

sales managers today are missing:

- Provide clear direction for sellers on how to get to quota—for all sales roles
- Ensure effective execution by coaching the right things, in the right measure, executed the right way
- Assess seller performance and make timely course corrections. It's all about helping your people make the best use of their time and effort. That's what coaches do.

When a salesperson is skilled at making important decisions about which priorities to pursue and which ones to ignore to—results follow. It's that simple. Crushing Quota teaches you how to develop the best coaching approach for your teams and their individual sellers using powerful research-based best practices. This is the definitive guide to making sales

coaching work for any sales team in any industry. State of Readiness John Wiley & Sons A company's worst enemy isn't always the competition. Sometimes it's the fear that lives within its own walls. This fear can take many forms: fear of not meeting a goal, of not getting a bonus, of losing decision rights and respect. Fear compels employees and managers to protect themselves by

creating seemingly impenetrable barriers fortified by rules and practices that benefit one group while harming others. Left unchecked, fear-driven barriers can spread at an alarming rate in a company. Workgroups define success not by reaching the company's overall goal, but by fulfilling their part of the process. Restrictive policies pile up until managers start to exert

extreme control over headcount and resources. Other managers feel compelled to build empires -- taking over other departments' functions to regain or enhance their self-sufficiency. In the midst of these counterproductive activities, employees suffer, success deteriorates, and efficiency dies. While these barriers might seem insurmountable, they aren't. They were built internally, and

they can be destroyed internally. By learning from the real-world lessons in this book, leaders, managers, and employees can overcome barriers that plague their company. It takes courageous leadership, and it can be difficult, but the result will be nothing less than transformational.

A proven approach for helping leaders and teams work

together to achieve better decisions, greater commitment, and stronger results. More than ever, effective leadership requires us to work as a team, but many leaders struggle to get the results they need. When stakes are high, you can't get great results by just changing what you do. You also need to change how you think. Organizational psychologist and leadership consultant Roger Schwarz

applies his 30+ years of experience working with leadership teams to reveal how leaders can drastically improve results by changing their individual and team mindset. Provides practical guidance to help teams increase decision quality, decrease implementation time, foster innovation, get commitment, reduce costs and increase trust. Start by applying the practical wisdom of *Smart Leaders, Smarter Teams. Strategic Agility*. Harvard Business Press. Explains how companies can recognize and promote leadership qualities, looks at

examples of good and poor leadership, and includes suggestions on long range goals. Resurgence: The Four Stages of Market-Focused Reinvention. Berrett-Koehler Publishers. This book provides the missing link of how to shift mindsets on how to work effectively. The word agile has moved far beyond its original meaning in helping to transform large organizations.

We now know that agile is used as the tool to accelerate an organization's ability to adapt and thrive in a world of accelerating change. This book provides the missing link of how to shift mindsets on how to work effectively. This shift requires an investigation of how we can move organizations in the way they think about work—especially work that does not

easily conform to the traditional plan-driven approach. The author takes the reader on a journey to be able to think in an A.G.I.L.E way. The approach taken is reflective and allows time for the insight to understand how to think differently about teams, work, and even organizations. It is said that all organizations are technology organizations, if that is true it brings risks

and opportunities that many organizations have not seen before. The framework of the book will help grow a new way of thinking and is anchored in: Adaptability; Growth; Improvement; Leadership; Experience. In order to make the full transition to thinking in an A.G.I.L.E way you will need to challenge everything you think you know about leading and working in large organizations.
