Canidia is one of the most well-attested witches in Latin literature. She appears in no fewer than six of Horace's poems, three of which she has a prominent role in. Throughout Horace's Epodes and Satires she perpetrates acts of grave desecration, kidnapping, murder, magical torture and poisoning. She invades the gardens of Horace's literary patron Maecenas, rips apart a lamb with her teeth, starves a Roman child to death, and threatens to unnaturally prolong Horace's life to keep him in a state of perpetual torment. She can be seen as an anti-muse: Horace repeatedly sets her in opposition to his literary patron, casts her as the personification of his iambic poetry, and gives her the surprising honor of concluding not only his Epodes but also his second book of Satires. This volume is the first comprehensive treatment of Canidia. It offers translations of each of the three poems which feature Canidia as a main character as well as the relevant portions from the other three poems in which Canidia plays a minor role. These translations are accompanied by extensive analysis of Canidia's part in each piece that takes into account not only the poems' literary contexts but their magico-religious details.

This book explains the rationale for changes in the DSM-5(R) related to incorporating behavioral addictions alongside substance use disorders; it also illuminates the significance of including the construct of behavioral addictions in this widely used psychiatric diagnostic manual. The chapters herien describe eight behaviors often considered addictions, including gambling disorder, internet gaming disorder, internet addiction, food addiction, hypersexuality, shopping addiction, exercise addiction, and tanning addiction. Also examined are prevalence rates in epidemiological samples, risk factors, and promising treatment approaches. The result is an easy-to-use resource and guide for clinicians, students, and researchers.

Maintaining dignity for patients approaching death is a core principle of palliative care. Dignity therapy, a psychological intervention developed by Dr. Harvey Max Chochinov and his internationally lauded research group, has been designed specifically to address many of the psychological, existential, and spiritual challenges that patients and their families face as they grapple with the reality of life drawing to a close. In the first book to lay out the blueprint for this unique and meaningful intervention, Chochinov addresses one of the most important dimensions of being human. Being alive means being vulnerable and mortal; he argues that dignity therapy offers a way to preserve meaning and hope for patients approaching death. With history and foundations of dignity in care, and step by step guidance for readers interested in implementing the program, this volume illuminates how dignity therapy can change end-of-life experience for those about to die - and for those who will grieve their passing.

Millions of people were -- and still are -- simultaneously bewildered, frustrated, and amazed by the problems posed by Rubik's cube. Co-written by the cube's inventor, this book serves as a comprehensive guide to the cube for both the puzzler and the mathematician. The book reveals the wealth of fascinating mathematics concealed within the cube's apparently simple operation, and even those who have solved the cube will discover a vast number of new ideas and possibilities.

For anyone who has ever wondered how computers solve problems, an engagingly written guide for nonexperts to the basics of computer algorithms. Have you ever wondered how your GPS can find the fastest way to your destination, selecting one route from seemingly countless possibilities in mere seconds? How your credit card account number is protected when you make a purchase over the Internet? The answer is algorithms. And how do these mathematical formulations translate themselves into your GPS, your laptop, or your smart phone? This book offers an engagingly written guide to the basics of computer algorithms. In *Algorithms Unlocked*, Thomas Cormen—coauthor of the leading college textbook on the subject—provides a general explanation, with limited mathematics, of how algorithms enable computers to solve problems. Readers will learn what computer algorithms are, how to describe them, and how to evaluate them. They will discover simple ways to search for information in a computer; methods for rearranging information in a computer into a prescribed order ("sorting"); how to solve basic problems that can be modeled in a computer with a mathematical structure called a "graph" (useful for modeling road networks, dependencies among tasks, and financial relationships); how to solve problems that ask questions about strings of characters such as DNA structures; the basic principles behind cryptography; fundamentals of data compression; and even that there are some problems that no one has figured out how to solve on a computer in a reasonable amount of time.

Since its founding in 1964, the United Republic of Tanzania has used music, dance, and other cultural productions as ways of imagining and legitimizing the new nation. Focusing on the politics surrounding Swahili musical performance, Kelly Askew demonstrates the crucial role of popular culture in Tanzania's colonial and postcolonial history. As Askew shows, the genres of ngoma (traditional dance), dansi (urban jazz), and taarab (sung Swahili poetry) have played prominent parts in official articulations of "Tanzanian National Culture" over the years. Drawing on over a decade of research, including extensive experience as a taarab and dansi performer, Askew explores the intimate relations among musical practice, political ideology, and economic change. She reveals the processes and agents involved in the creation of Tanzania's national culture, from government elites to local musicians, poets, wedding participants, and traffic police. Throughout, Askew focuses on performance itself—musical and otherwise—as key to understanding both nation-building and interpersonal power dynamics.

Academy of Parish Clergy's Top Ten Books for Parish Ministry Insights from a noteworthy convergence of top scholars in biblical studies and missiology Over the past half century, it has become clear that mission is a central theme in the Bible's narrative and, moreover, is central to the very identity of the church. This book significantly widens and deepens the emerging conversation on missional hermeneutics. Essays from top biblical and missiological scholars discuss reading the Scriptures missionally, using mission as a key interpretive lens. Five introductory chapters probe various elements of a missional hermeneutic, followed by sections on the Old and New Testaments that include chapters on two books from each to illustrate what a missional reading of them looks like. Essays in two concluding sections draw out the implications of a missional reading of Scripture for preaching and for theological education. CONTRIBUTORS Craig G. Bartholomew Richard Bauckham Carl J. This cultural and psychological study of gender identity and sexual development in a New Guinea Highlands society includes initiation rites and socialization studies, and contrasts the Sambia with other societies, including our own. Sambia boys experience ritualized homosexuality before puberty and do not leave it until marriage, after which homosexual activity is prohibited. The implications are developed cross-culturally and contextualized in gender literature.

A wedding. A trip to Spain. The most infuriating man. And three days of pretending. Or in other words, a plan that will never work. Catalina Martín, finally, not single. Her family is happy to announce that she will bring her American boyfriend to her sister's wedding. Everyone is invited to come and witness the most magical event of the year. That would certainly be tomorrow's headline in the local newspaper of the small Spanish town I came from. Or the epitaph on my tombstone, seeing the turn my life had taken in the span of a phone call. Four weeks wasn't a lot of time to find someone willing to cross the Atlantic-from NYC and all the way to Spain-for a wedding. Let alone, someone eager to play along with my charade. But that didn't mean I was desperate enough to bring the 6'4 blue eyed pain in my ass standing before me, Aaron Blackford. The man whose main occupation was making my blood boil had just offered himself to be my date. Right after inserting his nose in my business, calling me delusional, and calling himself my best option. See? Outrageous. Aggravating. Blood boiling. And much to my total despair, also right. Which left me with a surly and extra large dilemma in my hands. Was it worth the suffering to bring my colleague and bane of my

existence as my fake boyfriend to my sister's wedding? Or was I better off coming clean and facing the consequences of my panic induced lie? Like my abuela would say, que dios nos pille confesados. The Spanish Love Deception is an enemies-to-lovers, fake-dating.

The Cambridge Companion to Narrative JHU Press

The Cambridge Companion to Narrative provides a unique and valuable overview of current approaches to narrative study. An international team of experts explores ideas of storytelling and methods of narrative analysis as they have emerged across diverse traditions of inquiry and in connection with a variety of media, from film and television, to storytelling in the 'real-life' contexts of face-to-face interaction, to literary fiction. Each chapter presents a survey of scholarly approaches to topics such as character, dialogue, genre or language, shows how those approaches can be brought to bear on a relatively well-known illustrative example, and indicates directions for further research. Featuring a chapter reviewing definitions of narrative, a glossary of key terms and a comprehensive index, this is an essential resource for both students and scholars in many fields, including language and literature, composition and rhetoric, creative writing, jurisprudence, communication and media studies, and the social sciences.
