Lifespan Development 3e

Australasian McGraw-Hill Education

Human Development & Performance

Throughout the Lifespan, 2nd Edition is ideal for occupational therapy, physical therapy, and other rehabilitation disciplines. It provides a broad,

occupation-based viewpoint of development and performance throughout all life stages with an emphasis on the factors that influence daily participation and optimal performance of desired daily life tasks. The authors use a life course conceptual model as an organizational foundation for clinical reasoning to help readers understand how to implement the activity- and participation-based goals and outcomes for therapy. Written by an occupational therapist and a physical therapist, the book incorporates chapters by leading experts in human development, giving users cutting-edge information and a wide range of perspectives. By integrating information from the International Classification of Function and Disability (ICF) with a

developmental life-task perspective, the book gives both newcomers and experienced professionals an essential, contemporary frame of reference. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Life Span Motor Development SAGE Life Span Motor Development, Seventh Edition With Web Study Guide, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor

development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. An improved web study guide retains more than 100 video clips to sharpen observation techniques, while incorporating additional interactive questions and lab activities to facilitate critical thinking and hands-on application. The text also contains several updates to keep pace with the changing field: Content related to physical growth and development of the skeletal, muscle, and adipose systems is reorganized chronologically for a more logical progression. New material on developmental motor learning

demonstrates the overlap between the disciplines of motor development and motor learning. New insights into motor competence help explain the relationship between skill development and physical fitness. The text helps students understand how maturational age and chronological age are distinct and how functional constraints affect motor skill development and learning. It shows how the four components of physical fitness—cardiorespiratory endurance, strength, flexibility, and body composition—interact to affect a person’s movements over the life span, and describes how relevant social, cultural, psychosocial, and cognitive influences can affect a person’s movements. This edition comes with 148 illustrations, 60 photos, and 25

tables—all in full color—to help explain concepts and to make the text more engaging for students. It also retains helpful learning aids including chapter objectives, a running glossary, key points, sidebars, and application questions throughout each chapter. The enhancements to the seventh edition don’t end with revised content in the text. Instructors adopting the text for use in their course will find an updated ancillary package. The authors have revised the test package, and the instructor guide now includes feedback and answers to lab questions and “Test Your Knowledge” questions that appear throughout the book. In addition, the video clips that students view through the web study guide are available in separate files so they can be uploaded

into learning management systems or PowerPoint presentations. Life Span Motor Development, Seventh Edition, embraces an interactive and practical approach to illustrate the most recent research in motor development.

Students will come away with a firm understanding of the concepts and how they apply to real-world situations.

Human Development: A Life-Span View

F.A. Davis

The Life Span: Human Development for Helping Professionals, 4/e, provides an in-depth look at the science of human development, highlighting theories and research that have useful applications for individuals working in fields such as education, counseling, and social work. The main purpose of this book is to provide the reader with information that can be translated into professional “best practice” applications. Throughout, the text reflects the contemporary view that

life span development is a process deeply embedded within and inseparable from the context of family, social network, and culture. Because the book is designed for graduate students, most topics, especially those that have special relevance to helping professionals, are covered in greater depth than in a typical life span text. The expanded coverage of research in these areas will enhance students' understanding of the scientific basis for application to practice. From reviews of the book: “This book is unique in that it is research-based, includes comprehensive coverage of important course topics, and offers helping professionals information about human development that will enhance service provision to clients across the lifespan.” --Mary M. Chittooran, Saint

Louis University “The writing style is clear, interesting and engaging and is at a level appropriate for my students. Nicely done. . . . [The] case studies [and] developmental psychopathology sections are strengths. . . . [The book is] well organized, well-written, broad-based . . . , [and] insightful. [I] especially liked the authors' focus on practical and applied therapies, as well as their emphasis on research-based therapies that incorporate sound principles of human developmental.” --Rosalie A. Rohm, Ball State University “This readable, well organized text addresses the depth and scope of development. The text extends students knowledge of the material by providing a wealth of applicable information for those who are or will be in a helping profession. . . .

[Compared to other available texts, this one is] far superior in terms of the balance of scope and depth.” --Kathryn Cooper, Northern Colorado University New Interactive, Multimedia Learning Features in the Video-Enhanced Pearson eText: o See real examples. Embedded videos illustrate and explain key concepts and show individuals addressing the challenges of that period of the life span. (See pages 334, 342, and 353 for examples.) o Practice applying chapter content. The Practice Using What You've Learned feature includes scaffolded video and print case exercises that challenge readers to analyze and apply chapter content. Sample responses are available through the enhanced text. (See page 366 for examples.) See how to work with people

at different stages of the lifespan. Applications sections blend empirically supported information about treatments with the issues covered in each chapter, offering extensive discussion of how developmental science can inform practice. These include topics such as adolescent health and well-being, new approaches to maternity care, new interventions for promoting secure infant attachments, encouraging learning through play, helping parents avoid corporal punishment, and mindfulness-based practices, among many others. (See 357-360 for an example.)

**Women's Career Development
Throughout the Lifespan** Pearson
College Division

Women's careers have been a topic of research and discussion in many

disciplines including sociology, business, industrial, organisational and vocational psychology, and career guidance. Despite the introduction of equal employment legislation in many countries, women's patterns of career development continue to reflect structural labour market disadvantage. This unique book brings together expert contributions from academic researchers, as well as representing the voices of older women who participated in an international research investigation. Grounded in multidisciplinary empirical studies, the book provides:

- a variety of perspectives on women's careers in the 21st century
- an international exploration of the voice of the older woman
- an understanding of both the

challenges and responses to women as they construct their careers. Offering a comprehensive understanding of women's career development throughout the lifespan, this book will be of key interest to academics and researchers from the fields of education, psychology, management, geography, labour market economics and sociology, as well as career practitioners, managers, trainers, researchers and policy developers.

Essentials of Life-Span Development

Human Kinetics
Providing a solid foundation in the normal development of functional movement, *Functional Movement Development Across the Life Span, 3rd Edition* helps you recognize and understand movement disorders and effectively manage patients with abnormal motor function. It begins with coverage of basic theory, motor development and motor control, and evaluation of function, then discusses the body systems contributing to functional movement, and defines functional movement outcomes in terms of age, vital functions, posture and balance, locomotion, prehension, and health and illness. This edition includes more clinical examples and applications, and updates data relating to typical

performance on standardized tests of balance. Written by physical therapy experts Donna J. Cech and Suzanne "Tink" Martin, this book provides evidence-based information and tools you need to understand functional movement and manage patients' functional skills throughout the life span. Over 200 illustrations, tables, and special features clarify developmental concepts, address clinical implications, and summarize key points relating to clinical practice. A focus on evidence-based information covers development changes across the life span and how they impact function. A logical, easy-to-read format includes 15 chapters organized into three units covering basics, body systems, and age-related functional outcomes respectively.

Expanded integration of ICF (International Classification of Function) aligns learning and critical thinking with current health care models. Additional clinical examples help you apply developmental information to clinical practice. Expanded content on assessment of function now includes discussion of participation level standardized assessments and assessments of quality-of-life scales. More concise information on the normal anatomy and physiology of each body system allows a sharper focus on development changes across the lifespan and how they impact function.

SAGE Publications

Lifespan Development is the first textbook on this topic to be targeted to the high school student. In it, students learn about the different stages of development that people pass through as they age. From newborn to older adulthood, people continue to develop and change physically, cognitively, socially, and emotionally. Features covering cultural diversity, health, and safety are included throughout the text. Core Skills activities reinforce writing, speaking, math, and career readiness skills. The developmental theories of Erikson, Piaget, Vygotsky, and Kohlberg

are highlighted. A unit is dedicated to career paths in education and training and human services. Case studies are included in every chapter to help students relate classroom learning to the real world. "

Lifespan Development Routledge
Laura Berk's *Development Through the Lifespan* is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and

professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains-physical, cognitive, emotional, social-throughout

the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-

cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development.
