Hydroponic heroin : how to grow opium poppies without soil ... Hydroponics is a type of horticulture and a subset of hydroculture, which is a method of growing plants, usually crops, without soil, by using mineral nutrient solutions in an aqueous solvent. Terrestrial plants may be grown with only their roots exposed to the nutritious liquid, or, in addition, the roots may be physically supported by an inert medium such as perlite, gravel, or other substrates. Hydroponics - Wikipedia Hydroponics is a form of gardening that uses no soil, but instead grows plants in a solution of water and nutrients. A hydroponic system can grow plants and vegetables faster and year-round. Plants grown this way usually yield more, require less space, and conserve soil and water. 5 Ways to Start Hydroponic Gardening - The Spruce Hydro, a powerful synthetic drug which mimics marijuana, is more potent than its organic derivative and, arguably, more dangerous as the addiction rate is higher and long-term health effects are unknown. The drug problem sweeping the region is the subject of a new documentary in Ross Kemp's Extreme World series. Hydro: the drug epidemic sweeping through
