What has happened to Irish childhood? Parents are keeping their children indoors for fear of predators lurking around every corner and children are spending their days in front of screens or in supervised activities, over-controlled and growing steadily fatter and more unhappy. But it doesn't have to be like this. Commercial interests ensure parents feel anxious and filled with fear simply to sell them more stuff, when in fact childhood has never been safer; the rates of child mortality, injury and sexual abuse are lower today than at any time since records began. Cotton Wool Kids

exposes the truth behind the scary stories and gives parents the information and the confidence to free themselves from the the treadmill of after-school activities and over-supervision that has become common today. The author provides parents with strategies to learn how to handle the relentless pressure from society and the media to provide a 'perfect' childhood and instead to raise their children with a more relaxed and joyful approach, more in touch with the outdoors and the community around them.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how

to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not

even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of *Brands and Branding* provides an expert review of best practice in branding, covering everything from brand positioning to brand protection,

visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of

Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and

psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

 New York Times bestselling author, Food Network star, and *The Pioneer Woman* herself, Ree Drummond, brings us the first book in a brand-new picture book series! In Ree's own words: "I was all grown up when I moved out to the country. When I first arrived, I felt so out of place! But eventually, I looked around and discovered all the wonderful things about country life. So I decided to write a story about my experiences, as seen through the eyes of a little girl named Ree. "Little Ree moves to the country and feels as scared and unsure as I was. But then she finds that if she sets her

mind to it, being a country girl is a pretty cool thing. Come along on her adventures!" Little Ree trades in her city days for a country way of life when she moves with her family to her grandparents' ranch. She's excited to ride horses, swim in the pond, and help Grandma cook for everyone. But on her first day, she finds that living on a ranch can be tough. She has to get up at the crack of dawn, learn to herd cows, and make sure her horse, Pepper, doesn't eat everything in sight. And that's all before breakfast! Will she ever get used to this new place? Luckily, the end of the day brings a big family barbecue...and the happy discovery that being a country girl isn't about the right pair of boots, it's all about the right attitude. With warmth,
