The Handbook of Technology and Innovation Management Grin Publishing

The 5th Edition of Strategic Management of Technology and Innovation by Burgelman, Christensen, and Wheelwright continues its unmatched tradition of market leadership, by using a combination of text, readings, and cases to bring to life the latest business research on these critical business challenges. Strategic Management of Technology and Innovation takes the perspective of the general manager at the product line, business unit, and corporate levels. The book not only examines each of these levels in some detail, but also addresses the interaction between the different levels of general management - for example, the fit between product strategy and business unit strategy, and the link between business and corporate level technology strategy. Each part of the book starts with an introductory chapter laying out an overall framework and offering a brief discussion of key tools and findings from existing literature. The remainder of each part offers a selected handful of seminar readings and case studies. Almost all of the cases deal with recent events and situations, including several that are concerned with the impact of the Internet. A few "classics" have been retained, however, because they capture a timeless issue or problem in such a definitive way that the historical date of their writing is irrelevant.

From Knowledge Management to Strategic Competence South-Western Pub

How do companies such as BMW, Airbus Industrie, and Bayer leverage technology and learn to thrive where others fail? This book provides a one-stop resource on technology, innovation, and knowledge management. It gives you a tool for gaining short-term, case-specific insight and long-term, industry-wide understanding of the best technology management and learning policies and practices. The Strategic Management of Technological Learning explores a portfolio of case studies on technology-driven-but not exclusively high-tech-companies that have an overall long-term record of success and prosperity. Through in-depth interviews with industry practitioners, the author empirically identifies the presence of Strategic or Active Incrementalism. The following chart shows the studied firms, which operate at high risk and uncertainty, very dynamic, and technologically intensive business environments:

Volume 6 of Research on Technological Innovation, Management and Policy contains five papers on strategic change in firms and industries. All five discuss aspects of the interrelationships between technology strategy, competitive strategy, and organization and management. The first two address these at a level of the industry; the next two at firm level; in the final chapter, the level of analysis is primarily the technology. These five chapters are illustrative of themes in current research that are shaping the field of strategic management technology and innovation. They build well on earlier work in the field and thereby support its further empirical and theoretical development. They also provide useful insights for practicing managers faced with the challenges of changing technologies and a rapid rate of innovation.

Strategic Management of Technological Innovation Routledge

This updated, second edition of the book offers an understanding of the management of technology and innovation, not in isolation, but as a dynamic integrated system connected to organizational culture, knowledge management and value creation. To enhance the understanding of the hypercompetitive industrial markets of the globe, this edition carries two new chapters focusing on how technological innovation can lead to wealth creation. In doing so, it weaves wealth creation with other seminal concepts of social capital, human capital and knowledge management. An additional appendix outlines a few technologies and approaches that are useful in technology management. *Management of Technology and Innovation: Competing through Technological Excellence* provides a synoptic account of the diverse dimensions of technology management, from incremental innovation, integration of design and manufacture to technological innovation and creation of hybrid technologies. It provides an outline of the rationale of the strategic evaluation of investments in technology, and brings about its contrast with the conventional accounting framework of net present value (NPV) and discount cash flow (DCF) analyses. It also discusses the national technological/industrial policies of USA and Japan. This book will be an invaluable resource for management students and teachers studying the theory and practice of technology management.
